

POWERFUL PARTNERS

Preparing for the future starts now, but how do students apply what they have learned in school to the real world? Sharing college prep or vocational options and real world scenarios, will help our scholars thrive after high school. Here are some tips and websites to help students navigate the next step in their life.

Let's Talk Math!

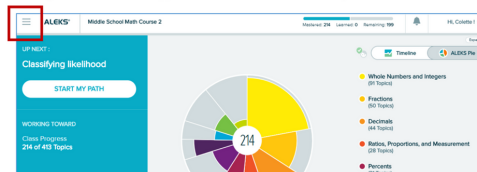

ALEKS

Did you know that your child has access to the McGraw Hill ALEKS program?

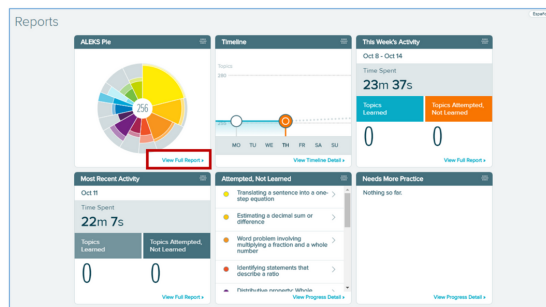

In this program, students take an initial knowledge check and pieces of a “pie” chart are filled in. Students work through topics they are ready to learn and new topics are opened up throughout the year.

Here is how you can see your child’s information and have a conversation with them regarding the program:

Select the **Main Navigation Menu** in the upper left corner and then select **Reports**.

The **Report Dashboard** displays quick overviews of important data applicable to your progress in ALEKS. You can move the tiles around by selecting the icon in the upper-right corner of a tile. Choosing the arrow at the bottom of the page will navigate to a second page of report tiles. Selecting **View Full Report** on a tile will give you more detailed information about that report.

There is also an SAT Pathway that is free for students to use and study for the SAT. If it has not been assigned to your child, have your child ask their teacher if it can be added.
